| 4. Construction Observation   | \$350 plus \$0.20/LF |

Our goal at the LCWSC is to communicate effectively with developers, contractors, and engineers to avoid costly mistakes and delays. Copies of the LCWSC design standards and the LCWSC standard specifications (on file with DHEC) are available upon request from the Engineering Department. The LCWSC also offers Delegated Review Program services to further streamline the DHEC construction permitting process. DRP permits can usually be obtained within one month of submitted a complete package to the LCWSC.
